

Course Title	Open Source and Communications Data Acquisition	Duration	One Day	Investigations
Aim	<p>As our world becomes more and more technology based, so should our investigations. If you realise this then you'll know that there's a wealth of information that can be accessed directly from your desktop, and without jumping through the usual hoops. Added to this is the wealth of 'closed source' <i>Communications Data</i> – data that is available, as long as you follow the correct procedures.</p> <p>This course will give delegates the skills and knowledge to obtain communications data using the RIPA / Investigatory Powers Act procedures. They'll learn what impact the IPA has on extant powers and will explore the use of <i>Open Source</i> information.</p> <p>Come on this course to learn to get the best out of <i>Open Source</i> and <i>Communications Data</i>. Find out about where to go to get information, how to use the internet effectively and who to ask if you need more. You'll wonder how you ever managed without it.</p>			
Prerequisites	None			
<p><i>NB : This course forms part of a professional qualification and includes delegate assessment during the course. A considerable amount of pre- and post- course guided learning is used in the delivery of this module.</i></p>
